

Employee Onboarding Concierge

Project Documentation

1. Overview

The Employee Onboarding Concierge is an AI-powered assistant that guides new hires through their first days and weeks at a company. It answers questions, shares the right documents, tracks onboarding tasks, and reminds people about what to do next.

Problem it solves: New employees often feel lost. HR teams answer the same questions again and again, and tasks get missed.

Goal: Make onboarding faster, smoother, and consistent for every new hire.

2. Objectives

- Give new hires one place to get answers 24/7
- Reduce repetitive questions to HR and IT
- Track onboarding progress for every employee
- Make sure all required tasks and paperwork are completed on time

3. Users

User	What they do
New Employee	Chats with the concierge, completes tasks, reads documents
HR Admin	Manages checklists, policies, and monitors progress
Manager	Assigns buddy, sets first-week goals, tracks team onboarding
IT Team	Handles laptop, email, and access requests

4. Key Features

1. **Chat Assistant** - Answers questions on policies, leave, payroll, benefits, and office info.
2. **Personalized Checklist** - Tasks based on role, department, and location.
3. **Document Center** - Offer letter, policies, forms, and handbooks in one place.
4. **Smart Reminders** - Email or app notifications for pending tasks and deadlines.
5. **Welcome Schedule** - Day 1 to Day 30 plan with meetings and training sessions.
6. **Buddy and Team Intro** - Shows team members, buddy, and key contacts.
7. **Progress Dashboard** - Completion status for HR and managers.
8. **Feedback Form** - Collects new hire feedback at Day 7, Day 30, and Day 90.

5. System Architecture

6. Onboarding Workflow

1. **Pre-boarding:** HR creates the employee profile. A welcome email is sent with login details.
2. **Day 1:** Concierge greets the employee, shares the schedule, and starts the checklist.
3. **Week 1:** Tasks such as ID setup, IT access, policy acknowledgment, and training.
4. **Day 30:** Check-in with manager and feedback form.
5. **Day 90:** Final review and onboarding marked complete.

7. Technology Stack (suggested)

Layer	Options
Frontend	React or simple web chat widget
Backend	Python (Flask/FastAPI) or Node.js
AI	Claude API with retrieval over company documents
Database	PostgreSQL or MongoDB
Notifications	Email (SMTP), Slack/Teams webhooks
Hosting	Cloud (AWS, Azure, or GCP)

8. Data Model (main tables)

- **Employee:** id, name, email, role, department, start_date, manager_id
- **Task:** id, title, description, due_days, owner, applies_to_role
- **EmployeeTask:** employee_id, task_id, status, completed_at
- **Document:** id, title, category, url
- **ChatLog:** id, employee_id, question, answer, timestamp
- **Feedback:** id, employee_id, stage, rating, comments

9. API Endpoints (sample)

Method	Endpoint	Purpose
POST	/api/employees	Create a new employee profile
GET	/api/employees/{id}/tasks	Get the onboarding checklist
PATCH	/api/tasks/{id}	Update task status
POST	/api/chat	Ask the concierge a question

Method	Endpoint	Purpose
GET	/api/documents	List company documents
GET	/api/progress/{id}	View onboarding progress
POST	/api/feedback	Submit feedback

10. Setup Guide

1. Clone the repository and open the project folder.
2. Create a virtual environment and install dependencies.

```
pip install -r requirements.txt
```

1. Create a .env file with your settings (API key, database URL, email settings).
2. Run database migrations.
3. Start the server.

```
python app.py
```

1. Open the app in your browser and log in as HR Admin to add tasks and documents.

11. Security and Privacy

- Role-based access: employees see only their own data
- Encrypt personal data and store API keys in environment variables
- Do not let the assistant share confidential salary or personal records
- Keep chat logs only as long as company policy allows
- Escalate sensitive questions (harassment, legal, health) to a human HR contact

12. Testing Plan

- **Unit tests:** task assignment, progress calculation, reminders
- **API tests:** all endpoints with valid and invalid input
- **Chat tests:** accuracy on a set of common HR questions
- **User testing:** try with a small group of new hires and collect feedback

13. Success Metrics

- Time to complete onboarding (days)
- Number of HR queries handled by the concierge
- Task completion rate
- New hire satisfaction score

14. Future Enhancements

- Voice assistant support
- Multi-language support
- Integration with HRMS tools like Workday or BambooHR
- Personalized learning paths

- Office navigation and desk booking

15. Conclusion

The Employee Onboarding Concierge gives every new hire a friendly guide from day one. It saves HR time, keeps onboarding consistent, and helps employees become productive faster.
